GURWINDER PARHAR

Full Stack Developer

Punjab, India | gurwinderanusurja@gmail.com | +91-7710590719 | LinkedIn | GitHub | Portfolio

Professional Summary

Full Stack Developer with 3+ years of professional experience bridging web development, dashboard design, and technical documentation. Builds fast, responsive, and accessible interfaces with JavaScript, React.js, and Bootstrap 5, including data dashboards, a project-management application, and an online store. Portfolio includes business applications, a BI analytics portal with a custom SVG chart library, and Larder Store with a Node.js back end. Also produces technical documentation and SEO-focused content.

Professional Experience

Front-End Developer Aug 2023 – July 2026

The Knowledge Academy (TKA) *Jalandhar, Punjab*

- Developed responsive, mobile-first web interfaces using HTML5, CSS3, JavaScript, React.js, and Bootstrap 5.
- Built reusable React components and modular UI elements to improve code maintainability and consistency.
- Implemented interactive UI features, dynamic forms, navigation systems, and client-side validation using JavaScript.
- Created responsive data tables, interactive charts, and dashboard interfaces using reusable front-end components.
- Customized WordPress themes, developed page layouts, and maintained website functionality and visual consistency.
- Used Git and GitHub for version control, code management, and collaborative development workflows.
- Tested and debugged web interfaces across mobile, tablet, and desktop devices to improve usability and cross-browser compatibility.

Web Developer Jan 2023 – Mar 2023

Ansh Infotech *Ludhiana, Punjab*

- Developed and maintained PHP-based web application features using HTML5, CSS3, JavaScript, and Bootstrap.
- Improved interface consistency and responsiveness across desktop and mobile devices.
- Assisted with optimization, troubleshooting, and maintenance, working with the team to resolve application issues.
- Implemented interactive UI components and form validation using JavaScript, HTML5, CSS3, and Bootstrap to improve usability and consistency.
- Assisted with cross-browser compatibility testing, debugging, and front-end performance optimization to ensure reliable functionality across devices.

Back-End & Databases	Node.js, REST API Design, SQL
Tools & Design	Visual Studio Code, Git, GitHub, Figma, Power BI, Linux
Content & SEO	Technical Documentation, SEO Copywriting, Keyword Research, Google Analytics, Google Search Console

Education

Bachelor of Computer Applications (BCA) August 2020 – May 2023

Lyallpur Khalsa College — Guru Nanak Dev University (GNDU) *Jalandhar, Punjab, India*

- Modules: Networking, Operating Systems, DBMS, Software Engineering, Web Technologies

Higher Secondary — Commerce Stream 2018 – 2020

Sutlej Public Senior Secondary School *Banga, Punjab, India*

Projects

ERP Business Management System — ***HTML5, CSS3, JavaScript, Bootstrap 5*** Live Demo

- Built a browser ERP demo with eleven modules: sales, purchasing, inventory, accounting, manufacturing and reports.
- Tracked stock and warehouses with low-stock alerts; managed sales orders, invoices and supplier tracking.
- Added employee directory, attendance and leave approvals, with Ctrl+K search and CSV export on every table.
- Added sign-up with a password strength meter, a one-click demo account, notifications and dark mode.

Project Management Application — ***HTML5, CSS3, JavaScript, Canvas, Drag and Drop API*** Live Demo

- Built a Kanban app with no framework; a heat engine scores each task 0–100 by priority, due date and idle time.
- Added a Time Machine slider that rewinds the board, plus a standup writer and a report of where work waits.
- Drag and drop with WIP limits, subtasks, a Ctrl+K command palette, undo, calendar and timeline views.
- Added team and reports pages, light and dark themes, and JSON backup and restore.

Enterprise SaaS Dashboard — ***HTML5, CSS3, JavaScript, SVG*** Live Demo

- Built a B2B commerce dashboard with a business pulse score (5–99) from revenue, conversion, churn and unpaid orders.
- Drew line, bar, donut, heatmap, funnel and tile-map charts in hand-written SVG, with date ranges that update every KPI.
- Built fifteen views with sortable paginated tables and a Ctrl+K command palette for plain-English questions.
- Added keyboard shortcuts, focus management, reduced-motion support and light, dark and system themes.

BI Analytics Portal — ***HTML5, CSS3, JavaScript*** Live Demo

- Built a Power BI-style portal with seven pages: Executive Overview, Sales, Marketing, Operations, Finance, Customers and Reports.
- Hand-wrote an SVG chart library in plain JavaScript with columns, lines, donut, funnel, heatmap, map and waterfall charts.
- Implemented drill-down and cross-filtering with year-over-year KPIs over 219,200 daily rows.
- Added group-by reports with search, CSV export and a print layout.

Larder Store — ***HTML5, CSS3, JavaScript, Node.js*** Live Demo

- Built an online store with mega menu, search, filters, product compare and quick view.
- Created a cart drawer with coupons and a four-step checkout: address, delivery, payment and review.
- Built a Node.js server with no packages that saves orders and re-checks prices on the server.
- Added an admin page protected by a key, with skip links and live regions for screen reader users.

Blogging Dashboard — ***HTML5, CSS3, JavaScript, Firebase*** Live Demo

- Built a writing dashboard with a streak heatmap, post counts and recent comments.
- Added a post editor with drafts, tags and cover images.
- Built a community feed with search, tag filters, likes and comments.
- Works in local mode or with Firebase accounts and security rules.

Certifications

- **Samsung Innovation Campus — Solve for Tomorrow** — **SEO for Beginners**
- **HTML Programming** — **CSS Programming** — **JavaScript Programming** — **C++ Programming**

Awards & Recognition

- **Best HTML & CSS Framework Developer** — Tech Fest 2022, Lyallpur Khalsa College, GNDU

Languages

- **English** — Proficient — **Punjabi** — Native — **Hindi** — Conversational
